Project Proposal Acceptance Letter

Subject: Acceptance of the project on behalf of Chaitanya Bharathi Institute of Technology (CBIT).

Dear Sir/Madam,

We have gone over the previous letter which you have sent me with the project proposal. We are happy to accept. Thank you for entrusting me with the current project from WINPRO Technologies, Rayachoty. You can be assured that I will be doing the best that I can in order to finish this project as efficiently as possible.

I've gathered from your letter, the problems are related with electrical field that we will need to stick to while our company working on this project with you.

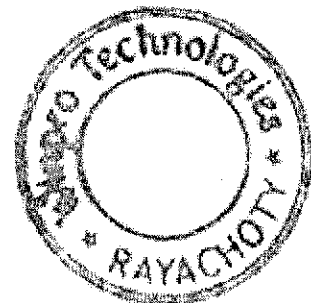

I just want to clarify our problem and expectation from your esteemed college proposal based to solve our particular problem as follows:

o **Need App for "Tourism Information with events(Tie App)"**

We are looking forward to working with you and hope that it will be a pleasant experience.

Regards,

Dear Sir / Madam,

Thank you for your interest in using CBIT to assist your Companies strategic automatic safety technology planning. We have extensive experience to solving problems faced by organizations to analyze their information needs, and devising plans for appropriate investment and management of technology. Based upon our discussions, I have attached a proposal which includes a detailed project work plan. Based on our preliminary discussions, it reflects an approach I believe would allow us to meet your needs within your requested budget and timeline.

For example, though we have suggested a number of teams be formed in order to ensure appropriate involvement of stakeholders and necessary roles, we have planned for only limited meetings of each team to take place (one for charging the team and one for making decisions). By focusing on providing appropriate written documentation and communication outside of meetings, we minimize time and "process", but maximize buy-in and results.

However, Our College could clearly vary the level of participation of stakeholders, management and us (all of which would have an effect upon both the cost and quality of the outcomes). Our college would be happy to discuss and modify this proposal once you have had a chance to review it.

By way of background, I am attaching a two-page description which includes a listing of recent projects and client references.

Sincerely,

Dear Sir/Madam,

Subject: Request for Budget Proposals: Project in support to the Industry-Reg.

With reference to subject cited above we proposing as per your request we are making App for "Tourism Information with events (Tie App)" towards your applications. The specified budget stated below.

S.NO.	Project Cost	Current Level of Funding
1	Staffing/Project Oversight	10,000.00
2	Direct Expenses	10,000.00
3	Other Expenses	10,000.00
4	Man power	35,000.00
5	Other Cost (Testing/Outsourcing/Power)	10,000.00
Total		75,000.00/-

As per state above the total cost of the project approximately **Rs: 75,000.00/-** Please send the above said amount towards advance then we will continue to complete your project.

Thanking you,

For Chaitanya Bharathi Institute of Technology

Tourism Information with Events (TIE APP)

The World Tourism Organization defines tourism more generally, in terms which go "beyond the common perception of tourism as being limited to holiday activity only", as people "traveling to and staying in places outside their usual environment for not more than one consecutive year for leisure and not less than 24 hours, business and other purposes. Tourism can be domestic or international, and international tourism has both incoming and outgoing implications on a country's balance of payments. There are three basic forms of tourism • Domestic tourism • Inbound tourism • Outbound tourism. In existing system Nowadays few peoples are faced problems to find famous tourist places in India and some tourist guides are asking a high money and there is no good communication between guide and user. People are facing problems to book a rental car and finding events address and facilities. In existing systems, it shows only places and doesn't give exactly facilities of places. Due to this people are facing food and accommodation problems at unknown places. The main problems are They cannot provide direct access to the google maps. They cannot have booking facility. They cannot have shortest path root mapping. **I have to proposed** This application is used for gathering of total tourism places including with events and Locations of restaurants, temples etc with relevant information about tourism.

- It can access the locations directly by using Google map.
- It can update the notifications of events whenever it occurs.

They have the facility of booking the buses, restaurants and hotel room bookings facilities are provided. In this their booking a nearby hotel rooms by the use of app user registration, so in this main advantages are It guides us to the direct root mapping. Shows the booking facilities.

Dear Sir/Madam,

Subject: Request for Proposals: Project in support to the Industry.

The Chaitanya Bharathi Institute of Technology (CBIT) is pleased to be invited to propose a lending facility for the company. In order for us, however, to offer CBIT to your industry a firm commitment of lab facility, we will need to work closely with you to complete proposal offering by you.

If you give the opportunity to consult on some of the challenges facing in industrial background with our CBIT, definitely we help to get the remedies for that particular issue and get your company on track so you can reach your dreams of expansion. You are already aware of our CBIT background tend to lend these type of engineering proposals.

Our motto: To provide comprehensive Engineering solutions for our Industry facing problems.

Our resources:

- We work with a core team of experts in various fields who have had years of experience as well as impeccable references.
- We, as an adroit engineering college, are providing an outline of our technical and personnel resources in order to assure competence in handling large volumes of work.

Our Objectives through this proposal:

- To show our preparedness for any contingency including technical glitches and troubleshooting exercises.
- We also hope to capitalize on our previous experience in solving engineering related problems.

We hope to hear from you soon regarding our proposal.

Thanking you Sir,

Sincerely,

Dear Sir/Madam,

Subject: Request for Proposals: Project in support to the Industry

The Chaitanya Bharathi Institute of Technology (CBIT) is pleased to be invited to propose a lending facility for the company. In order for us, however, to offer CBIT to your industry a firm commitment of lab facility, we will need to work closely with you to complete proposal offering by you.

If you give the opportunity to consult on some of the challenges facing in industrial background with our CBIT, definitely we help to get the remedies for that particular issue and get your company on track so you can reach your dreams of expansion. You are already aware of our CBIT background tend to lend these type of engineering proposals.

Our motto: To provide comprehensive Engineering solutions for our Industry facing problems.

Our resources:

- We work with a core team of experts in various fields who have had years of experience as well as impeccable references.
- We, as an adroit engineering college, are providing an outline of our technical and personnel resources in order to assure competence in handling large volumes of work.

Our Objectives through this proposal:

- To show our preparedness for any contingency including technical glitches and troubleshooting exercises.
- We also hope to capitalize on our previous experience in solving engineering related problems.

We hope to hear from you soon regarding our proposal.

Thanking you Sir,

Sincerely,

Vidya Nagar, PRODDATUR - 516 360. YSR District, Andhra Pradesh

Project Proposal Acceptance Letter

Subject: Acceptance of the project on behalf of Chaitanya Bharathi Institute of Technology (CBIT).

Dear Sir/Madam,

We have gone over the previous letter which you have sent me with the project proposal. We are happy to accept. Thank you for entrusting me with the current project from Focus Corporation, Kadapa.

You can be assured that I will be doing the best that I can in order to finish this project as efficiently as possible.

I've gathered from your letter, the problems are related with electrical field that we will need to stick to while our company working on this project with you.

I just want to clarify our problem and expectation from your esteemed college proposal based to solve our particular problem as follows:

- Need App for "Crime Reporter and missing Persons Finder"
- Need App for "Agro Solutions"

We are looking forward to working with you and hope that it will be a pleasant experience.

Regards,

Pradeepreddy

Dear Sir / Madam,

Thank you for your interest in using CBIT to assist your Companies strategic automatic safety technology planning. We have extensive experience to solving problems faced by organizations to analyze their information needs, and devising plans for appropriate investment and management of technology. Based upon our discussions, I have attached a proposal which includes a detailed project work plan. Based on our preliminary discussions, it reflects an approach I believe would allow us to meet your needs within your requested budget and timeline.

For example, though we have suggested a number of teams be formed in order to ensure appropriate involvement of stakeholders and necessary roles, we have planned for only limited meetings of each team to take place (one for charging the team and one for making decisions). By focusing on providing appropriate written documentation and communication outside of meetings, we minimize time and "process", but maximize buy-in and results.

However, Our College could clearly vary the level of participation of stakeholders, management and us (all of which would have an effect upon both the cost and quality of the outcomes). Our college would be happy to discuss and modify this proposal once you have had a chance to review it.

By way of background, I am attaching a two-page description which includes a listing of recent projects and client references.

Sincerely,

Dear Sir/Madam,

Subject: Request for Budget Proposals: Project in support to the Industry-Reg.

With reference to subject cited above we proposing as per your request we are making Apps for "Crime Reporter and missing Persons Finder" and "Agro Solutions" towards your applications. The specified budget stated below.

1. Crime Reporter and missing Persons Finder

S.No.	Project Cost	Current Level of Funding
1	Staffing/Project Oversight	10,000.00
2	Direct Expenses	10,000.00
3	Other Expenses	10,000.00
4	Man power	35,000.00
5	Other Cost (Testing/Outsourcing/Power)	17,000.00
Total		82,000.00/-

2. Agro Solutions

S.No.	Project Cost	Current Level of Funding
1	Staffing/Project Oversight	10,000.00
2	Direct Expenses	10,000.00
3	Other Expenses	10,000.00
4	Man power	35,000.00
5	Other Cost (Testing/Outsourcing/Power)	13,000.00
Total		78,000.00/-

As per state above the total cost of the project approximately Rs: 1,60,000.00/-
Please send the above said amount towards advance then we will continue to complete your project.

Thanking you,

TITLE: CRIME REPORTER AND MISSING PERSON FINDER

ABSTRACT:

This App allows user to file complaints or missing reports and keep a track of it. There are 3 categories that a user can file; Complaint, Crime Report and Missing Report and can see all the status of what action has been taken by the admin. To file any of the above 3 the user should register himself to the system and provide his right credentials to file them. The App also allows other user who doesn't want to register but can only check the crimes at his or any other area, just provide the pin code and in return the system displays the crimes if any failed. The Front End of the App is done using Android Studio and SQL server as a backend to store books lists and inventory data. The App has both the user as well the Admin Part, the role of admin is to just check all the 3 modules or categories and update their status likewise. This App helps the user in tracking any report filed to the law and take an advantage of reporting any complaint from anywhere bringing the whole system online.

Title: AGRO SOLUTIONS

ABSTRACT:

Agro solutions is a web application. AgroSolutions is used to give awareness to the farmers. This application is entirely based on the problems faced by the farmers and suggesting the appropriate solutions for the problems faced in the existing system by the farmer. Some of the critical and major problems faced by the farmer are lack of proper knowledge regarding to usage of pesticides facing confusion regarding to choosing crops as per the respective seasons. There are some more problems like storing the crops after their yield, not knowing the actions to be taken In case of crop damages farmers may face problems regarding to price fixing .some may face problem regarding the Land,Crop, storage In the current existing system the farmer faces the problems regarding,Storage location and Lack of perfect suggestions.Usage of fertilizers and We faces the problems regarding the weather. We also faces the problems regarding selection of seasonal crops.We proposed the Agrosolutions to create awareness among the farmers regarding selection of crops, choosing Fertilizers, Storage location etc and to help farmers.We can overcome the confusion of farmer regarding choosing the crop. We can easily locate the nearby storage location of crops by maintaining the contact numbers and address.With the help of admin farmers can take suggestions regarding their problems.Farmer can easily find out the day to day changes in the weather.

TITLE: BLOOD BAR

ABSTRACT:

The software system is an Blood Bar management system that helps in managing various blood bank operations effectively. The project consists of a central repository containing various blood deposits available along with associated details. These details include blood type, hospital details and donor details, location. These details help in monitoring the blood deposits. The project is an online system that allows to check whether required blood donors of a particular group are available in the blood bank. **In this existing System,** Whenever we implement new application to developed to remove the coming of an Existing system. There is no such kind of application developed for the particular organization. There is no proper communication between patients and donors. There is no such kind of application for a given information about blood details and hospital facilities.so the disadvantages are More man power, Time consuming. In Proposed system we enable donors to fill the donor submission form, in which they fill their detail like their location, contact no etc. Volunteers can fill their details in volunteers registration form and can login with their user id and password. After submitting the donor details the donors are unable to delete the details or unable to change the submitted details. When the volunteers login with their id and password they are able to search the required blood group persons in application. Then the volunteers directly contact with donors by their location and contact and then proceed for blood donation. The main advantages are in time availability of blood, Emergency issue of blood.
