Transition is an on-going process in everyone's life that takes place at different stages. This might be from the final years of school to the early years of higher education, occupational training, independent living or social opportunities. Also it can be from the final years of college/campus to the early years of one's career. Transition from campus to career needs more attention as it involves a lot of planning. The objective of the planning must ensure that the person possesses the necessary skills to enable the person to cope up with the corporate culture and climate. Guest gave tips to students to manage corporate world:

- Punctuality is very mandatory. It is better to arrive at work on time. Strictly follow the rules and regulations of the corporate.
- Listen, observe and give attention to every minor detail before jumping to any conclusions.
- Stay away from internal politics and gossip. It is better to observe the happenings around us and not contribute to it.
- Follow professional ethics by imparting values and manners. For instance, one's friend's room may be okay with him, but barging into the employer's room is not acceptable. Use simple magic words like 'Please' and 'Thank you'.
