CBIT IT Workshop Lab Course Objectives and Course Outcomes

Course Objectives:
This course is designed to:

- To make the student know about the internal parts of a computer.
- Assembling and disassembling a computer from the parts.
- Installing the Microsoft operating system.
- To provide Technical training to the students on Productivity tools like Word processor, Spreadsheets, Presentations.
- To learn about Networking and security of computers and use Internet facility for Browsing and Searching.

Course Outcomes:

- Disassemble and Assemble a Personal Computer and prepare the computer ready to use.
- Prepare the Documents using Word processor and Prepare spreadsheets for calculations.
- Using mail.
- Prepare Slide presentations using the presentation tool.
- Interconnect two or more computers for information sharing.
- Access the Internet and Browse it to obtain the required information.

CBIT Data Structures Lab Course Objectives and Course Outcome:

Course Objectives:
This course is designed to:

To solve computational problems with the help of data structures.
Familiarize the application of stacks.
Exploring basic data structures such as stacks and queues.
Introduces variety of data structures such as hash linked list, trees and graphs.
Introduces searching and sorting algorithms.

Course Outcomes:

1. Implement stack and queue data structures using array and linked list.
2. Demonstrate the applications of stack and queue data structures.
3. Implement sorting and searching algorithms and to compare their efficiency.
4. Implement binary tree, binary search tree and tree traversal.
5. Solve graph problems using appropriate data structure.
